

LETTER TO DOCTOR

Date:

Dear Dr. _____:

Your patient, _____, is being seen
in the _____ for help with behavior problems.
He tells us that he is taking some psychotropic medications that you have prescribed for him.
We wonder if it would be profitable for these medications to be reduced as he gains control of
his reactions to the stresses in his life. It is our desire to work with you in this, so we have
instructed him to see you so that you may evaluate his progress and adjust medication as needed.
We have also encouraged him to not change or reduce medications you have ordered without
your supervision. We will appreciate any information you can give us that will be of assistance
in dealing with his problems.

Thank you for your cooperation with us.

Sincerely,

Counselor
